

Lockheed Martin's LCS team has delivered a low-risk solution to one of the U.S. Navy's highest global security priorities: dominance in coastal waters. A conventional steel hull that can be affordably built and maintained anywhere. A combat system common with Navy surface combatants. Easy access to ports. Interoperability, flexibility and survivability. Lockheed Martin's LCS: A warship built on proven performance.

THE SHAPE OF LITTORAL DOMINANCE HAS A FAMILIAR LOOK.
